ADLER 2K-Epoxi-Grund containing no zinc chromate 68304 f

Solvent-based anti-corrosive primer and adhesion promoter for industrial and professional use

PRODUCT DESCRIPTION

General
- Solvent-based 2K-primer based on epoxy resin for indoors and outdoors. Excellent anti-corrosive action on steel, outstanding adhesion on aluminium, zinc and non-ferrous metals, good adhesion on various paintable plastics, consolidates the MDF substrate

Application areas
- Metal constructions made of iron, steel, non-ferrous metals with zinc, aluminium and copper and materials made of coatable, solvent-resistant plastics, as well as wood. High-quality MDF front doors.

PROCESSING

Instructions for use
Spraying is only allowed in spray booths complying with the VOC Directive.
- Please stir the product before use.
- The temperature of the product and object, and the room temperature must be at least + 10 °C.
- The optimal processing conditions are between 10 – 25 °C with a relative humidity of 40 – 80 %.

Mixing ratio
7 parts 2K-Epoxi-Grund 68304 f
1 part ADLER Epoxi-Härter 82313

Pot life
1 working day
**Application technique**

<table>
<thead>
<tr>
<th>Application method</th>
<th>Brushing</th>
<th>Rolling</th>
<th>Cup gun</th>
</tr>
</thead>
<tbody>
<tr>
<td>Spraying nozzle (Ø mm)</td>
<td>-</td>
<td>-</td>

<tr>
<td>Yield per application (m²/l)</td>
<td>10 – 12</td>
<td></td>
<td></td>
</tr>
</tbody>
</table>

The shape, properties and dampness of the substrate affect the consumption/yield. Accurate values for consumption must be obtained by applying trial coats in advance.

**Drying times**

*(room temperature 20°C)*

<table>
<thead>
<tr>
<th>Recocatable</th>
<th>after approx. 3–4 hours</th>
</tr>
</thead>
<tbody>
<tr>
<td>Ready for sanding</td>
<td>after approx. 12 hours</td>
</tr>
</tbody>
</table>

The figures given above are reference values. The drying time depends on the type of substrate, coat thickness, temperature, air exchange and relative atmospheric humidity.

Avoid direct sunshine (dries too quickly).

**Cleaning the**

**Working equipment**

With ADLER Epoxi-Streichverdünnung 80389 or ADLER Epoxi-Spritzverdünnung 80364 or ADLER Aceton-Waschmittel 95130.

**SUBSTRATE**

**Type of substrate**

Iron and steel, non-ferrous metals and coatable plastics, MDF boards

**Substrate property (or condition)**

The substrate must be dry, clean, capable of holding the paint, free from separating substances such as grease, wax, silicone, resin etc. and free from wood dust, as well as tested for suitability for coating.

Please observe and follow ÖNORM B 2230 Part 3.

See also VOB, Part C, DIN 18363, Paragraph 3, painting and coating work.

Any coatings that cannot be recoated must be removed thoroughly.

**Preparation of the substrate**

**Iron and steel**

Remove rust down to bare metal.

Thoroughly remove greasy or oily impurities using ADLER Entfetter (degreaser) 80394.

**Zinc, aluminium and other non-ferrous metals**

Sand matt with grinding fleece and ADLER Entfetter 80394.

**Hard PVC and coatable plastics**

Sand matt with grinding fleece and ADLER Entfetter 80394.

**MDF boards**

Sand with grit size 150 and clean.

**Old coats of paint**

Sand with grit size 120 and clean. Remove old coatings that
cannot be recoated. The compatibility of the paint must be tested on old coats of synthetic resin (risk of “lifting”).

Please observe the respective technical data sheets of the products.

### COATING SYSTEM

<tr>
<td>Please observe the respective technical data sheets of the products.</td>
<td></td>
</tr>
</tbody>
</table>

**Intermediate sanding**

- Grit size 240
- Remove sanding dust.

**Intermediate and finishing coat**

ADLER 2K-Epoxi-Grund 68304 f can be recoated with practically any solvent and water-based intermediate and final coats. An exception is chlorinated rubber paints, which are practically no longer used however (swimming pool paintwork, heavy-duty corrosion protection).

**Product code for paints and varnishes**

M-GP01

**Safety-related information**

Please pay attention to the associated safety data sheet. The current version can be accessed on the Internet at [www.adler-lacke.com](http://www.adler-lacke.com).

In general, inhaling paint aerosols must be avoided. This is ensured by correctly using a breathing mask (combination filter A2/P2 – EN 141/EN 143).
