

Aquawood Finapro 60

5176

Water-based, gloss, thick-film glaze for wooden windows and front doors for industrial and professional use

It has been matched as a system with a 3-coat structure

	PRODUCT DESCRIPTION
General	Glosy, water-based, breathable thick-film glaze, with very good weather resistance and high transparency. The product is characterized by a high level of block resistance, very good impact strength, quick resistance to water, short drying times, optimised resistance against mechanical damages, natural appearance and good feel of the surface.
	The product is formulated without the addition of biocidal active agents to protect against blue stain and wood-destroying fungi.
Special properties and standards	ÖNORM EN 71-3 Safety of toys; migration of certain elements (free of heavy metals)

 French ordinance DEVL1104875A regarding the marking of construction coating products for their emission of volatile pollutants: A+

Application area

- For dimensionally stable timber components for exterior and interior use, such as e.g. wooden windows and front doors.
- For humid areas (e.g. indoor pools) only with a special coating system.
- For non-dimensionally stable timber components we recommend thin-film systems such as Lignovit Lasur 5315 or Pullex Plus-Lasur 4415.

Please observe the relative technical data sheets of the products.

PROCESSING

Instructions for use

- Please stir the product before use. However, prevent entry of air while stirring.
- The temperature of the product and object, and the room temperature must be at least + 15 °C.
- The optimal conditions for use are between 15 – 25 °C with a relative atmospheric humidity between 40 – 80 %.
- Too high dry film thicknesses beyond around 120 µm reduce the diffusion capacity and should thus be avoided.

09-22 (supersedes 02-21) ZKL 5176

ADLER-Werk Lackfabrik, A-6130 Schwaz

Phone: 0043/5242/6922-190, Fax: 0043/5242/6922-309, Mail: technical-support@adler-lacke.com

- Sealants must be compatible with the coat and may only be applied once the paint has dried through. Sealing profiles with plasticizers tend to stick together in combination with paints. Please only use those types that have been tested.
- An intermediate coating with Aquawood Intermedio ISO 5705 is recommended to prevent air inclusions in deep-pored hardwood species and to avoid film interference on larch.
- When changing from Aquawood Finapro 60 5176 to other waterborne paint systems, care must be taken to ensure adequate intermediate cleaning of the lines and spray equipment, preferably with warm water.
- Please follow our ARL 300 Working guideline for coating dimensionally stable and limited dimensionally stable construction elements - General part along with all standards and guidelines for window construction.

Application technique

Application meth- od	Airless	Airless air-supported (Airmix, Aircoat, etc.)
Spray nozzle (ø mm)	0.28 or 0.33	0.28 or 0.33
Spray nozzle (ø inch)	0.011 or 0.013	0.011 or 0.013
Spraying angle (degrees)	20 – 40	20 – 40
Spraying pressure (bar)	80 – 100	80 – 100
Atomized air (bar)	-	0.5 – 1.5
Spraying distance (cm) (cm)	approx. 25	
Thinner	water	
Thinner- added in %	0 - 5	
Wet film (µm)	225 - 275	
Yield per applica- tion (g/m²) ¹⁾	450 - 500	
Dry film complete coating system (μm)	80 up to max. 120	
1) Yield including addition of thinner and loss while spraying		

The shape and properties of the substrate and wood moisture affect the consumption / yield. Accurate values for consumption must be obtained by applying trial coats in advance.

Drying times (at 23 °C and 50 % rel. humidity)

Dust-dry (ISO 1517)	approx. 1 hour
Tack-free	approx. 2 hours
Stackable with PE fine foam spacers at	after approx. 5 hours
room temperature:	
Stackable with PE fine foam spacers after	after approx. 130
forced drying:	minutes
20 minutes flash-off zone	
90 minutes drying stage (max. 35 - 40 °C)	
20 minutes cooling stage	
Recoatable	after approx. 12
	hours

The figures given above are reference values. The drying time depends on the wood type, workpiece shape, coat thickness, temperature, air exchange and relative atmospheric humidity.

Lower temperatures and/or high level of atmospheric humidity can increase the drying time.

Avoid direct sunlight!

Cleaning the working equipment

Clean with water immediately after use.

To remove dried paint residues we recommend using Aqua-Cleaner 80080 (diluted 1:1 with water).

	SUBSTRATE
Type of substrate	Wood in accordance with the guidelines for window construction.
Substrate property	The substrate must be dry, clean, capable of holding the paint, free from separating substances such as grease, wax, silicone, resin etc. and free from wood dust, as well as tested for suitability for coating.
Wood moisture	13 % +/- 2 %
	COATING SYSTEM
General	The following coating systems are exemplary.
Impregnation	1 x Aquawood Primo A3 5453 – A6 5456
	Intermediate drying time: approx. 4 hours
	Use wood preservatives safely. Always read the label and observe the relative technical data sheets of the products before use.
Intermediate coat	Softwood: 1 x Aquawood Intermedio DQ 5706
	Hardwood and Larch: 1 x Aquawood Intermedio ISO 5705
	Intermediate drying time: approx. 2 hours
	Please observe the relative technical data sheets of the products.

Intermediate sanding

Grit size 220 - 240

Remove sanding dust.

Finishing coat

1 x Aquawood Finapro 60 5176

For front doors:

An additional application of Aquawood Protect 53215 is necessary (colourless two-component varnish).

Please observe the relative technical data sheets of the products.

MAINTENANCE AND RENOVATION

Maintenance

The durability depends on several factors. These include particularly the type of weathering, constructional protection, mechanical stress and the choice of colour applied. To obtain long durability, preservation work is necessary in time. Therefore, we recommend annual maintenance.

Cleaning with Clean-Möbelreiniger 51696. Maintenance with Top-Care 7227 in the package Windoor Care-Set 7229.

Please observe the relative technical data sheets of the products.

Please observe our ARL 304 - Working guidelines for coating dimensionally stable and limited dimensionally stable construction elements - Maintenance and Renovation.

ORDERING INFORMATION

Size of trading unit

5 kg, 25 kg, 120 kg poly drum

gloss

Colour shades / degrees of Colour shades can be obtained using the ADLER colour mixing system ADLERMix.

Base coat:

Basis W30 5176000030

- In order to ensure uniformity of the colour shade, use only material having the same batch number on a given surface.
- It is recommended to prepare a trial colour sample on the original substrate using the coating system selected in order to assess the final colour shade.
- In order to lay particular emphasis on the wood structur, the colour shade of Aquawood Primo A3 - A6 should be darker than the one of Aquawood Finapro 60.

OTHER INSTRUCTIONS **Durability/storage** At least 1 year in the original sealed containers. Make sure the product is protected against moisture, direct sunlight, frost and high temperatures (above 30 °C). **Technical specifications VOC-content** EU threshold for Aquawood Finapro 60 (cat. A/e): 130 g/l (2010). Aquawood Finapro 60 contains a maximum of 20 g/I VOC. Further information on the subject of safety during transport, storage Safety-related information and handling as well as disposal can be found in the relevant safety data sheet. The current version can be accessed on the Internet at www.adler-lacke.com. The product is only suitable for industrial and professional use. While grinding use at least dust filter P2 / P3 as personal protective equipment to protect against sanding and wood dust. Inhaling paint aerosols whilst spraying must generally be avoided. This is ensured by correctly using a respiratory mask (combination

filter A2/P2).
