

Floor-Finish

4202

Water-based sealing coat with anti-slip properties for DIY and rofessional use

	PRODUCT DESCRIPTION	
General	Non-yellowing parquet sealing lacquer on a polyurethane-acrylate copolymer dispersion basis. The product can be applied either as a one- component product or as a two-component product after the addition of hardener. The product is characterized by excellent abrasion and scratch resistance, with special non-skid finishing, very good filling power and excellent surface resistance to chemical influences.	
Special properties and standards		
	• ÖNORM EN 71-3 Safety of toys; migration of certain elements (free of heavy metals)	
QUALITY CHECK	• DIN 53160-1 and DIN 53160-2 Perspiration and saliva-proof properties	
	• ÖNORM C 2354 High usability is achieved if a casting application is done three times with respective intermediate sanding; the requirements of stress class A and B according to ÖNORM C 2354 are met; stress class C (when 2K processing)	
	 ÖNORM A 1605-12 (furniture surfaces) Resistance to chemical reactions: for 1K processing: 1-B for 2K processing: 1-B1 Response to abrasion: for 1K processing: 4-E (≥ 0,9 N) for 2K processing: 4-D (≥ 1,0 N) 	
	 ÖNORM A 3800-1 (fire behaviour) In conjunction with a flame-retardant substrate: flame-retardant, Q1, Tr 1 	
	• BGR 181 and DIN 51130 Meets the requirements of slip resistance class R9. Confirmed by an external test certificate.	
	 French ordinance DEVL1104875A Confirmed by an external test certificate. Marking of construction coating products for their emission of volatile pollutants: A+

Our instructions are based on the current state of knowledge and are intended to advise the buyer/user to the best of our knowledge, but must be individually adapted to the areas of application and processing conditions. The buyer/user is responsible for deciding on the suitability and use of the supplied product, which is why we recommend that a sample be produced to check the suitability of the product. In all other respects, our General Terms and Conditions of Sale apply. All previous data sheets lose their validity with this edition. We reserve the right to make changes to container sizes, color shades and available gloss levels.

	2354) such as anterooms, offices, busines			
	Two-component processing: For wooden to particularly high levels of stress (stre			
Application area	One-component processing: For moderately to heavily stressed wooder floors and parquet flooring, especially in private residential areas. Meets th requirements of stress classes A (medium stress) and B (heavy stress according to ÖNORM C 2354.			

The shape and surface condition of the workpiece as well as the type of application influence the actual consumption. Accurate values for consumption must be obtained by applying trial coats in advance.

Drying times	Sandable and recoatable approx. 4 hour(s)			
(at 23 °C and 50 % rel. humidity)	Walkable approx. 8 hour(s)			
	Attention: Do not put on carpets before 8 days at the earliest.			
	The figures given above are reference values. The drying time depends on the type of substrate, coat thickness, temperature, air exchange and relative atmospheric humidity. To ensure perfect drying, good room ventilation must be provided. Lower temperatures and/or high level of atmospheric humidity can increase the drying time.			
				Avoid direct sunlight!
				Cleaning the working
	equipment	To remove dried product residues we recommend using Abbeizer Expres (8313).		
	SUBSTRATE			
Type of substrate	Hard and softwood (solid wood)			
Substrate property	The substrate must be dry, clean, capable of holding the paint, free fror separating substances such as grease, wax, silicone, resin etc. and free fror wood dust, as well as tested for suitability for coating.			
	Any coatings that cannot be recoated must be removed thoroughly.			
Wood moisture	Hardwoods: 12 ± 2 %			
	Softwoods: 15 ± 2 %			
Substrate preparation	Hardwoods: Grit size 150 – 180			
	Softwoods: Grit size 120 - 150			
	If there are small cracks and joints, fill them with a mixture of 1 part b weight of sanding dust and approx. 2 parts by weight of Floor-Fill (4207) After approx. 1 hour of drying, sand the filled areas with grit size 120 - 150.			
	COATING SYSTEM			
Primer coat	1 x Floor-Start (4205)

	Intermediate drying: approx. 4 hour(s) Before the final coating, light intermediate sanding is carried out with gr size 240 or used abrasive grid size 120 or finer.			

Finishing coat	1 x Floor-Finish (4202)
	MAINTENANCE AND RENOVATION
Cleaning and maintenance	Cleaning with water or mild household cleaners for the first time after 14 days.
	For cleaning purposes Clean-Parkettreiniger (7207) can be added to wiping water.
	Refresh the sealing depending on the stress and if necessary with Clean- Parkettpflege (7204).
Renovation	Grind sealings that are heavily worn off using a special floor roll grinder. Use a corner grinder or an eccentric grinder for the border areas. Further processing as per new coating (see coating system).
	Note: Do not apply Floor-Finish (4202) to floors consisting of prefabricated parquet elements, treat them instead with Clean-Parkettpflege (7204) (parquet care).

	FURTHER DETAILS
Durability / storage	Min. 1 year(s) in the original sealed containers.
	Make sure the product is protected against moisture, direct sunlight, frost and high temperatures (above 30 °C).
	Close opened containers well and use up the content as soon as possible.
Giscode	W3+
Declaration of ingredients according to VdL-RL 01	PUR dispersion / water / glycol ether / rheology additives / interface additives / wetting agent / surface additve / in-can preservation agents
	Contains 1,2-benzisothiazol-3(2H)-one, reaction mass of 5-chloro-2- methyl-2H-isothiazol-3-one and 2-methyl-2H-isothiazol-3-one (3:1). May cause allergic reactions.
	Information for allergy sufferers under telephone no. +43 5242 6922-713.
Safety information	The usual protective measures must also be observed when processing low- pollutant products.
	During sanding use P2 / P3 dust filter.
	If medical advice is needed, have the packaging or label ready.
	If the product comes into contact with your eyes, rinse immediately with water.

It should be kept out of reach of children.

Ensure proper ventilation during and after application.

During work, do not eat, drink or smoke.

Do not allow to enter drains, water courses or soil. Only dispose of empty containers for recycling, liquid material residues can be disposed of as water-based paint waste, dried material residues as hardened paint or as household waste.

Further information on the subject of safety during transport, storage and handling as well as disposal can be found in the relevant safety data sheet. The current version can be accessed on the Internet at **www.adler-lacke.com**.
